

DIGGING PERMIT - CONSTRUCTION PROJECT

The location of all utility installations including electric, natural gas, water (domestic), chilled water, sewer, telephone, or any other underground installations that reasonably may be expected to be encountered during excavation work, shall be determined prior to digging. University Representative and individual(s) performing work must be present during marking of high voltage locations.

Utility companies and various University Departments must be advised of the proposed work and asked to establish and identify the location of the utility underground installations prior to digging on University property.

Contractor or other entity requesting permission to dig:

UC Department or Company: _____ Date: _____

Contact Name: _____

Telephone No.: _____

Cell Phone No.: _____

E-mail: _____

UC Project No.: _____ Project Name: _____

UC Project Representative: _____

Telephone No.: _____

Cell Phone No.: _____

Fax No.: _____

Location of proposed work: _____

When high voltage installations are exposed, the location must be verified by Facilities Management prior to proceeding with work.

Location verified by: _____ Date: _____

Facilities Representative **Date**
