

The Learning Agreement

During new student orientation you will meet with an advisor. Together, you will review the requirements of the program you plan to enter and develop a learning agreement, a specific plan to prepare you for your transition.

The learning agreement contains the details of what you need to do to transition, including necessary coursework, meetings with your advisor and tutors, and use of campus resources.

Successful completion of your learning agreement ensures your transition to one of the five participating colleges.

You can enroll in CAT for as long as one full academic year. Our mutually shared goal, however, is for you to transition as soon as you can.
