The Sixth Annual Howard A. Stafford Lecture in Economic Geography

GLOBALIZATION and IMPACTS of TRADE on U.S. WAGE INEQUALITY

Dr. David L. Rigby

Professor of Geography and Statistics, UCLA
Director, UCLA Census Research Data Center and Research Affiliate, U.S. Bureau of the
Census

Thursday, May 5, 2011, 3:30 pm
Swift Hall 500, University of Cincinnati
Reception, 2:30 pm, Braunstein 420

Dr. Rigby is an economic geographer. He is currently working on three projects:

1. Impacts of trade on jobs and wages across the U.S. economy
2. The evolution of spatial-industrial clusters and agglomeration economies
3. Developing an evolutionary economic geography

Representative publications include:

Rigby, D.L. and S. Breaux 2008. Impacts of trade on wage inequality: A case study of Los Angeles using matched employer-employee data. *Annals of the Association of American Geographers* 98: 920-940.

Baldwin, J.R., Brown, W.M. and D.L. Rigby 2010. Agglomeration economies: Microdata panel estimates from Canadian manufacturing. *Journal of Regional Science* 50: 915-934.

Essletzbichler, J. and D.L. Rigby 2007. Exploring evolutionary economic geographies. *Journal of Economic Geography* 7: 549-571.
