Common Work Results for Plumbing | 22 05 00

The following information shall be included in specifications prepared for use on all University of Cincinnati construction and renovation projects. This information is supplemental and not intended to be a complete specification.

GENERAL STANDARDS

General Criteria

General information on prohibited and preferred practices:

- Domestic hot water can be produced using either central plant steam or electric heating equipment. Semi-instantaneous is preferred when steam is used. Heat exchangers shall be piped to allow flushing in place.

- Water in garages shall be available at hose bibs at a minimum of two locations at opposite corners of garages, per floor.
