The following information shall be included in specifications prepared for use on all University of Cincinnati construction and renovation projects. This information is supplemental and not intended to be a complete specification.

**GENERAL STANDARDS**

**General Criteria**
This section applies to the requirements for identification of electrical raceways, conductors, and equipment.

Review and modify the attached guide specification, “Electrical Identification,” as required to meet the project requirements.

**Design Evaluation**
The following information is required to evaluate the design:
- **Schematic Design Phase**: Outline specifications
- **Design Development Phase**: Draft specifications
- **Construction Documents Phase**: Complete specifications

**Submittals**
Refer to the attached guide specification, “Electrical Identification.”

**PRODUCT STANDARDS**

*(No standards for this section.)*

**EXECUTION STANDARDS**

**Construction & Installation**
Refer to the attached guide specification, “Electrical Identification.”
Identification

For the panel labels, use the identification system shown below:

- Identify all switches and receptacles with panel and circuit numbers.
- Identify all major electrical distribution equipment, such as panels, bus plugs, transformers and ATS.
