Title: Jr. Health Physics Technician 2

Essential Function

Under general supervision from a designated administrator, perform basic health physics technician duties associated with the Radiation Safety Office.

Characteristic Duties

- Perform duties associated with the receipt and distribution of radioactive material packages (i.e., inspect and determine placement of packages, conduct appropriate contamination surveys and record data, check sealed radioactive sources for leakage, perform necessary follow-up, etc.).
- Survey laboratories for radioactive materials contamination and violations of the University of Cincinnati Radiation Control and Safety Program.
- Assist in the collection, processing, disposal and shipment of radioactive waste.
- Maintain inventory of radioactive material and other records.
- Keep the Assistant Radiation Safety Officer or Radiation Safety Officer informed of any violations of government regulations or University or Cincinnati Radiation Control and Safety Program policies.
- Perform related duties based on departmental need.

Minimum Qualifications

- Must have one (1) year experience at the Jr. Health Physics Technician 1 level and meet all requirements of that position.

Career Path

- A Jr. Health Physics 2 will be eligible for promotion to Staff Health Physics Technician 1 within one (1) year to two (2) years provided the employee has good performance evaluations, satisfactorily complete probation, demonstrate an ability to perform at that level and complete the required education and training program, meet the minimum qualifications of the position and possess a valid HAZMAT Commercial Driver's License. The promotion must be recommended and based on departmental need.

Unusual Working Conditions

- Must be able to demonstrate ability to bend, reach, pull, push and lift up to 40 pounds without mechanical assistance.
