Title: Staff Health Physics Technician 2

Pay Scale Group: 97C

Essential Function

Under general supervision from a designated administrator, perform routine health physics technician duties associated with Radiation Safety Office.

Characteristic Duties

- Receive, survey, record and distribute radioactive material packages as instructed by supervisor (i.e., review, inspect and determine placement of packages; conducting appropriate contamination surveys and record data; and perform necessary follow-up with appropriate departments).

- Assist in the collection, processing, disposal and shipment of radioactive waste in accordance with applicable rules and regulations.

- Survey laboratory for radioactive contamination and violations of the University of Cincinnati Radiation Control and Safety Program.

- Provide radiation safety assistance to hospitals as directed (i.e., monitor patient rooms and adjacent areas and implement the necessary precautions).

- Maintain inventory of radioactive materials and other records.

- Calibrate survey equipment under direct supervision.

- Keep the Assistant Radiation Safety Officer or Radiation Safety Officer informed of any violations of government regulations or University Radiation Safety policy.

- Act as first responder for the Radiation Safety Office.

- Instruct Radiation Safety personnel and others as necessary on radiation safety policies and procedures.

- Perform related duties as assigned by the Radiation Safety Officer and/or Assistant Radiation Safety Officer.

Minimum Qualifications

- Must have one (1) year experience at the Staff Health Physics Technician 1 level and meet all requirements of that position.
Title: Staff Health Physics Technician 2

Pay Scale Group:
97C

Career Path

- A Staff Health Physics Technician will be eligible for promotion to Sr. Health Physics Technician after one (1) year provided the employee has good performance evaluations, satisfactorily complete probation, demonstrate an ability to perform at that level and complete the required education and training program, meet the minimum qualifications of that position and possess a valid HAZMAT Commercial Driver’s License. Must also successfully pass a departmentally administered exam. The promotion must be recommended and based on departmental need.

Unusual Working Conditions

- Must be able to demonstrate the ability to bend, reach, pull, push and lift up to 40 pounds without mechanical assistance.
