Title: Industrial Hygienist 3

Essential Function

Under general supervision from a designated administrator, assist in the development, monitoring and coordination of industrial hygiene programs.

Characteristic Duties

- Perform complex and specialized field evaluation leading to the recognition, evaluation and control of chemical, environmental and/or biological contaminants as part of a comprehensive safety program.

- Perform a variety of health and safety fieldwork and assist with complex industrial hygiene assessments and make specific recommendations as to the need for, or the effect of, control measures.

- Advise the university community regarding industrial hygiene protocols and procedures to ensure regulatory compliance as mandated by local, state and federal agencies.

- Oversee the development and presentation of industrial hygiene training programs and educational activities.

- Plan, coordinate and conduct routine and follow-up surveys/field studies and investigations for the university facilities and departments.

- Utilize a variety of industrial hygiene monitoring, sampling and analytical equipment to evaluate chemical, biological and noise exposures.

- Analyze accident and incident reports for trends; make recommendations for correcting unsafe conditions and actions.

- Respond to emergencies involving hazardous materials; prepare reports of findings and submit recommendations.

- Review building project plans for compliance with local, state and federal regulations.

- May provide direct supervision to exempt and non-exempt staff (i.e., hiring/firing, performance evaluations, disciplinary action, approve time off, etc.).

- Perform related duties based on departmental need.
Title: Industrial Hygienist 3
