3361:10-5-18  Organization: vice president and chief information officer.

(A) The vice president and chief information officer (CIO) shall, under the general supervision of the senior vice president for administration and finance, provide leadership and coordination for all aspects of information technology for the university. The vice president and CIO shall be responsible for central university-wide academic and administrative information technology support services, policies and architecture, including information processing, networking, telecommunications, instructional technology, and information systems.

(B) The senior vice president for administration and finance may assign additional responsibilities to the vice president and CIO as deemed necessary.
