The students alternate between practice quarters and school quarters on the following schedule:

(A) For engineering students enrollment for summer quarter course work is prerequisite to eligibility for referral to autumn quarter professional practice openings. However, depending on the availability of appropriate practice assignments, the possibility exists that the referral of a student enrolled for summer classes could be deferred until winter or spring quarter. Students enrolled for classes in the summer quarter, if they desire, also may elect to vacation in the autumn quarter. Students vacationing in the summer quarter or in the autumn quarter will be eligible for practice assignments in either the following winter or spring quarter. It should be noted, that an engineering student must be employed on his/her first practice assignment no later than the winter or spring quarter of the pre-junior (third) year in order to fulfill a minimum of four satisfactory work quarters.

(B) An arts and sciences student must be employed on his/her first practice assignment no later than the winter or spring quarter of the pre-junior (third) year in order to fulfill the minimum requirement of four satisfactory work quarters.

(C) Once enrolled in the program, co-op students must complete all scheduled practice assignments through the last scheduled practice quarter in the senior year.
