(A) All undergraduate students enrolled in the following departments are required to participate in the professional practice program: fashion design, graphic design, industrial design, interior design, architecture, and urban planning. Students in the digital design track of industrial design are not required to participate in professional practice.

(B) Requirements for admission to the professional practice program:

(1) To qualify for admittance to the program a student must be in good academic standing and be willing to accept assignments to any geographic location within the continental United States, to either a "Section I" or "Section II" schedule, and be free of any deficiencies or restrictions, academic or other, that would interfere with such an assignment. Students in the professional practice program are required to continue the alternation of academic quarters with professional practice quarters until graduation. Students transferring into the program must complete all their remaining quarters on an alternating basis and must be available for a minimum of four professional practice quarters.

(2) All students desiring to participate in the professional practice program must complete the "Professional Development Course, Introduction to cooperative education" by enrolling in the specific class as designated on their major-field schedule, as a prerequisite to their participation in the program. Transfer students who have not previously completed this course must enroll in this course in the earliest possible school section when it is offered.
