

Default User Folder Structure

Main types of folders available to users on first login

When logging into Box for the first time, you will be presented with two categories of folders. Note the following universal properties before examining details on the next slide.

- Folder owners decide who can access content and prevent downloading
- Restricted data allowed only in marked folders
- Data Loss Prevention enforced

Box Restricted Data Folder Legend

All Files + Folders – No Restricted data

Shared & synced folder – No Restricted data

Restricted Data folder – Restricted data allowed

External shared folder – No Restricted data

COMPLIANT

Default User Folder Structure
