

1.) Start in InDesign:

The screenshot shows the Adobe InDesign interface with a poster design. The poster has a red background with white text. Annotations include:

- Good Contrast:** A yellow callout pointing to the large white text '60-80%' on the red background.
- Threaded Text:** A blue callout pointing to the main body text 'OF STUDENTS DO NOT FEEL OK IDENTIFYING OR REPORTING THEIR DISABILITY ON CAMPUS'.
- Ungroup Objects:** A purple callout pointing to the text area.
- Add Alternative text to images:** A yellow callout pointing to the University of Cincinnati logo and the Twitter icon.

On the right side, the Layers and Tags panels are visible:

- Layer Order:** A green callout pointing to the Layers panel, which lists various text layers.
- Tags:** A red callout pointing to the Tags panel, which shows the assigned accessibility tags for the text elements.

2.) Finish in Acrobat Pro:

The screenshot shows the Adobe Acrobat Pro interface with the Accessibility Checker and Touch Up Reading Order panels open over the poster design.

- Run Accessibility Checker:** A blue callout pointing to the Accessibility Checker panel on the left, which shows the document's accessibility status.
- Check Reading Order:** A green callout pointing to the Touch Up Reading Order panel on the right, which allows for manual adjustments to the document's reading order.
