

BSW - PERSONAL INTERESTS AND INFORMATION

FIELD PLACEMENT PREFERENCES

If you have thoughts about the type of field placement assignment you would like, please use the space below to tell me about your preferences. For example, do you have special areas of interest such as working with adolescents, older adults, substance abuse, or developmental disabilities? Is there a field of practice such as child welfare, mental health, or medical social work which is of particular interest? What are your long term career goals? You do not have to know the answer to any of these questions – that’s OK. I just want to know if you do have preferences. I may need to refer to the information you provide when I am making field placement interview assignments.

Please state here anything of a personal nature which should be taken into consideration in planning for your agency assignment (for example, mental or physical illness, physical needs, learning disabilities, past felony or police records, substance abuse). This information is confidential.

Thank You!
