

## JMP 8.0.1 for Macintosh Installation Instructions

### System Requirements

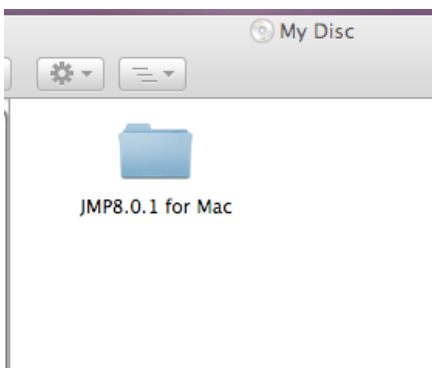

1. Mac computer with an Intel, PowerPC G5, or PowerPC G4 (867MHz or faster) processor
2. Mac OS X 10.5 or higher
3. 512 MB minimum RAM, 1GB recommended
4. 110 MB minimum free disk space
5. UNICODE compliant ODBC 3.0 or higher (required only if connecting to database)

### Installation Instructions

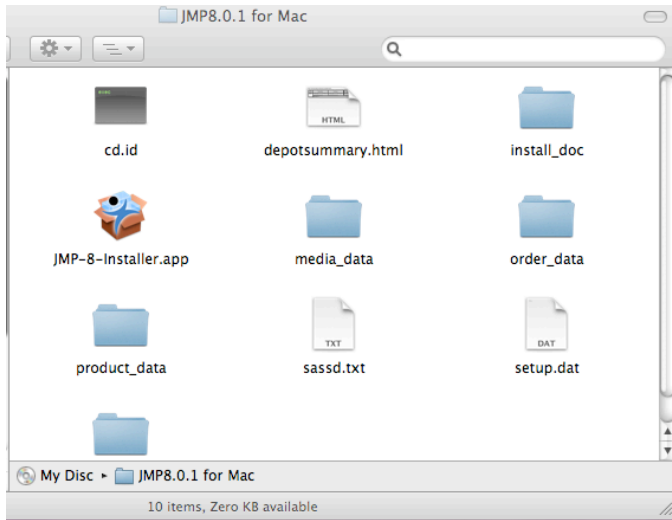

1. Insert CD. Double Click on the My Disc icon to open the JMP CD.

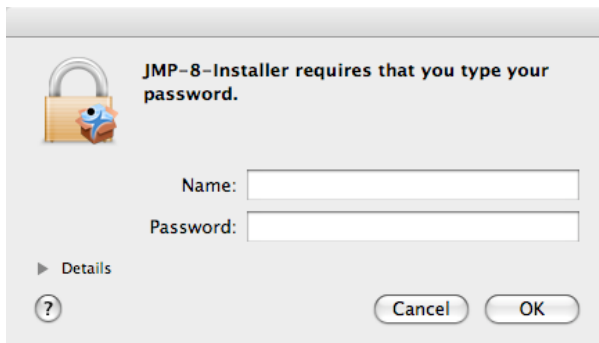

2. Open the JMP8.0.1 for Mac folder.

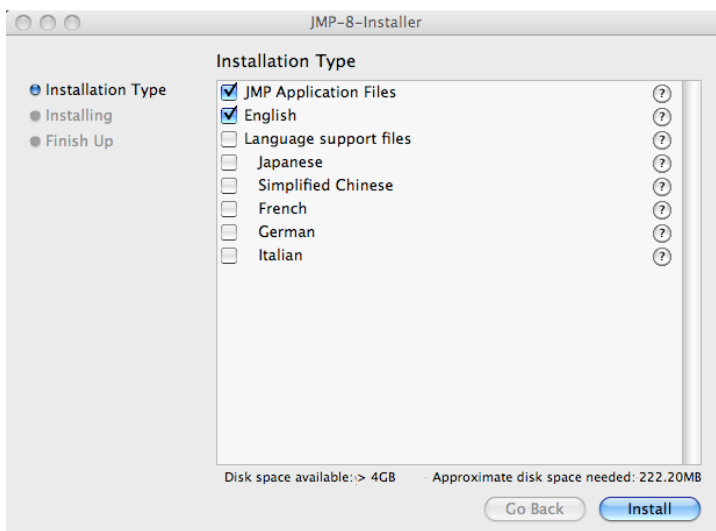

3. Double click JMP-8-Installer.

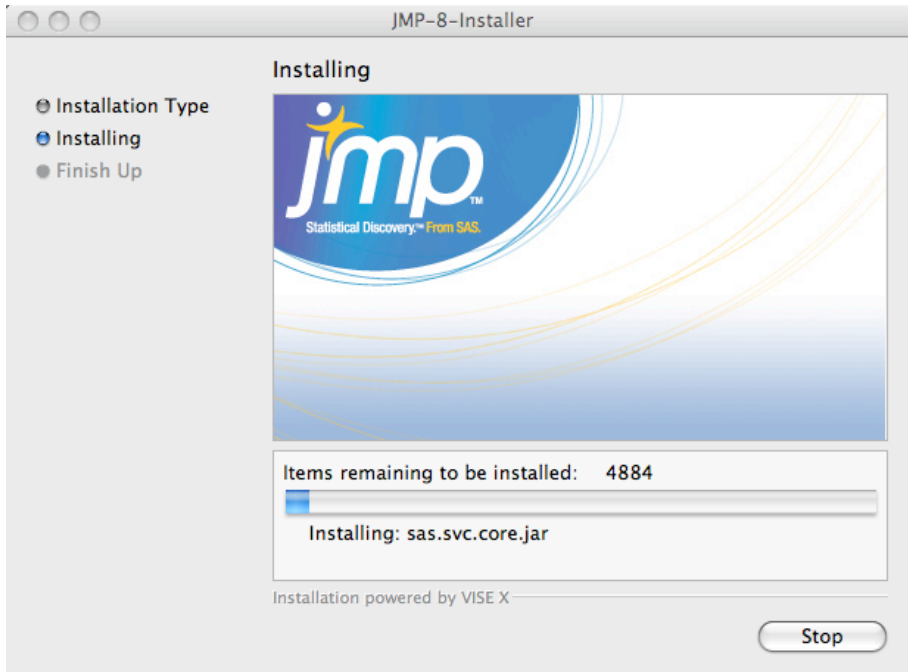

4. Enter your Administrator name and password.

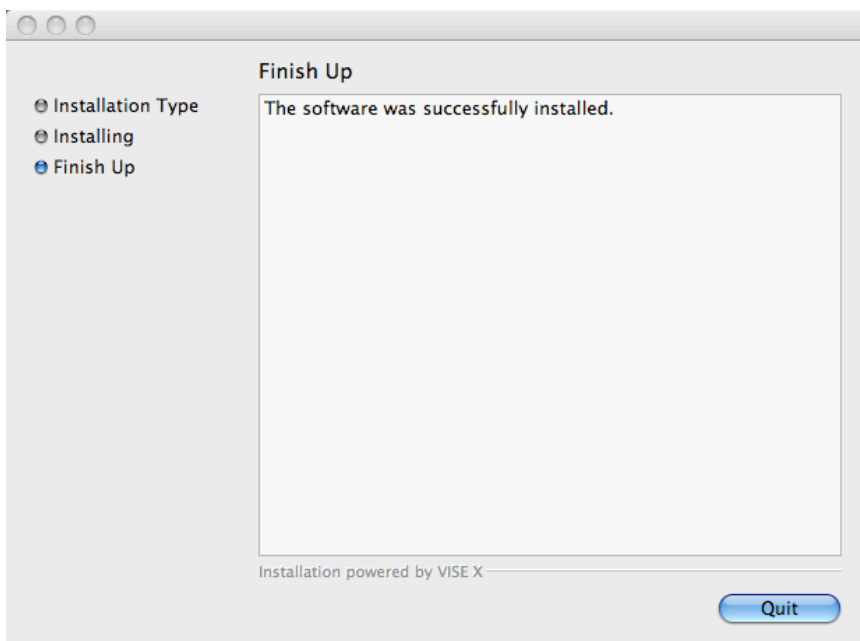

5. Click Install.

6. While installing, the progress bar will show you the remaining items to be installed.

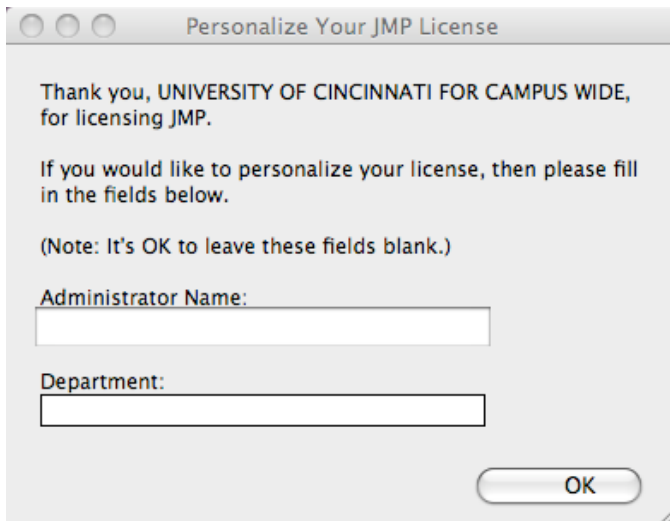

7. Click Quit.

- You may now eject the CD.  
Start JMP. (Jmp is found in the Applications folder.) Click Open License

- You should have received the license file in an email from [software@uc.edu](mailto:software@uc.edu). Browse to location of the JMP license file, and then click Choose.
- Enter your name and department,, or leave these fields blank. Click OK.

- JMP will now start.
