

Installing Microsoft Windows XP Professional on a PC

Creating a CD from the Disk Image

- 1.) Download the disk image.
- 2.) If you do not have software capable of burning ISO images download ImgBurn (<http://www.imgburn.com>).
- 3.) Once ImgBurn is installed right click on the ISO file and choose "Burn using ImgBurn."
- 4.) Insert a blank CD-R.
- 5.) Click Write.

Installing Windows XP Professional w/SP3

- 1.) Verify system requirements and install updates if needed.
- 2.) Insert CD and boot to CD.
- 3.) Choose what partition (or create a new one) to install Windows.
- 4.) After the install completes follow the onscreen instructions to setup a user account.
- 5.) Install device drivers (either from disc provided by OEM or via their website).
