02810D - IRRIGATION SYSTEMS

A. All projects with site work shall have an irrigation system with backflow preventers. On most projects the water supply shall run through the University meters rather than City meters so that storm sewer rates are not applied. Coordinate requirements through the University Project Manager.

B. Piping for irrigation systems shall be Polyvinyl chloride (PVC).

C. *Underground irrigation system shall be as manufactured by Toro. Products by other manufacturers will not be accepted.*
