SECTION 08210D - WOOD DOORS

A. Plastic laminate faced doors are prohibited.

B. Use of wood doors in exterior situations shall be reviewed by the University Architect.

C. Wood doors shall be AWI Premium Grade, 5 ply, hot press, flush type with hardwood veneers and particle board core.

D. Hollow core wood doors are prohibited.

E. Fire Rated Doors: 1-1/2 hr. (90-minute), 2 hr. (120-minute), 3/4 hr. (45-minute) and 20 minute doors must be factory premachined to qualify for U.L. labels per NFPA Pamphlet 80. Indicate fire ratings of doors by time (hours, minutes) rather than by letter designations (eg. A, B, C).

F. Mineral Core Labeled Doors are Prohibited.

G. Wood Veneers: Require the Contractor to make a grain selection, prior to placing wood doors in the more prominent or public places, subject to the approval of the Associate. If project has both, rated and nonrated, add provisions to the specification to require samples for verification and provisions to reject doors that do not match.

END
