SECTION 08800 - GLAZING

Include the following information into specifications prepared for use on University of Cincinnati projects. This information is supplemental and not intended to be a complete specification.

PART 1 - GENERAL

1.0 WARRANTY

A. Warrant insulating glass for a period of 10 years after date of Substantial Completion, against deterioration. Deterioration of insulating glass is defined as failure of hermetic seal due to other causes than breakage which results in intrusion of dirt or moisture, internal condensation or fogging, deterioration of protected internal glass coating, if any, resulting from seal failure, and any other visual evidence of seal failure or performance.

1. Warranty shall not cover glass breakage due to physical abuse, earthquake, storm, or similar causes.

B. Warrant mirrors for a period of 5 years after date of Substantial Completion, against deterioration. Deterioration of mirror glass is defined as the development of silvering defects, including discoloration, clouding, reduction of image visibility, spots or similar physical or visual defects

C. Warrant flatness of single light and insulating glass such that distortions caused by material defects, insulating vacuum spaces, installation stresses or similar failures shall be remedied for period of 5 years after date of Substantial Completion.

D. Warrant laminated glass for a period of 5 years after date of Substantial Completion, against development of manufacturing defects including edge separation or delamination which materially obstructs vision through glass.

END OF SECTION
