GYPSUM BOARD

09250D - GYPSUM BOARD

Gypsum board may be used only in office areas occupied by University employees. Gypsum board shall 5/8" thick. 1/2" thick or thinner gypsum board in a single layer application is prohibited, except at areas with radius.

In public spaces standard gypsum board should not be used. In corridors, lobbies, and other common public areas a hard veneer plaster system over gypsum base should be specified.

In dormitory and other high use areas, durable products such as FiberBond by Louisiana Pacific or equal should be considered. Final selection of products shall be determined by the University Project Manager and the Associate, based on project requirements.
