09900D - PAINTING

A. Specify that record data of paint colors used on projects be submitted to the University as part of the Contract Closeout procedure. The University will maintain this information for future maintenance.

B. The University paint shop maintains limited colors from Devoe. Unless project requirements dictate otherwise, colors selected should be from this program. Coordinate approval of paint colors with the University Project Manager who will check with the University paint shop.

B. Manufacturers: ICI paint stores color names and numbers are referenced as the color standard. Unless project requirements dictate otherwise, colors selected should be from the University Of Cincinnati Interior Color Guidelines. Any exceptions must be requested in writing and approved by the University Project Manager. Coordinate approval of paint colors with the University Project Manager.

C. Interior painted ceilings and walls in classrooms, offices, dormitories, restrooms, corridors and stairways should be finished with a premium quality high solids latex, acrylic latex or vinyl latex paint.

1. Walls shall be finished with semi-gloss paint.
2. Ceilings shall be finished with a flat paint, unless otherwise approved by the University Project manager.

D. Interior painted doors, windows and trim should be finished with a premium quality water-borne acrylic semi-gloss enamel.

E. Paint products should not be specified in areas where additional abrasion, chemical and moisture resistance is important. Verify material with University Project Manager.

F. Solvent thinned finishes such as polyurethane and epoxy should not be used unless authorized by the University Project Manager.

G. Paints containing lead or zinc chromates are prohibited.
