15990D - TESTING ADJUSTING AND BALANCING

A. SECTION INCLUDES

1. Testing, adjusting and balancing (TAB) air and water distribution systems.
4. Verifying that automatic control devices are properly functioning.
5. Measuring sound and vibration.
6. Reporting results

B. SECTION DOES NOT INCLUDE

1. Performance testing for systems and equipment.
2. Factory or field testing for quality assurance.

(Note: Performance, factory and field testing shall be included in the section that specifies the equipment and system)

C. DESIGN CRITERIA

1. Specify sufficient TAB devices, as part of the design documentation, to properly serve the TAB objective.
2. Check with UC Project Manager, for status and application of the University’s Commissioning Standard and additional TAB criteria.
