SECTION 16440D - DISCONNECT SWITCHES

A. PRODUCT

1. Disconnect switches shall be heavy duty type.

2. Switches that serve loads requiring neutral conductor shall have neutral routed through switch.

3. Fusible switches shall be equipped with rejection type fuse clips.

4. Switches serving motor loads shall be horsepower rated.

B. EXECUTION

1. Fusible switches shall have fuse identification label mounted to inside cover of switch door.

2. Switches shall be located so they can be operated from a height A.F.F. not greater than that accessible from a 5 ft. step ladder.

3. Where wall space is not available to mount switch, provide floor supported steel angle or channels.

4. Switches shall not be mounted to ductwork or piping of other trades.
