SECTION 16465D - BUSWAYS

A. BUSWAYS: The Associate shall consider the use of feeder busways in lieu of conduit and wire for loads in excess of 800 amperes. This design shall be discussed with the University Architect at the preliminary and basic review conferences. Plug-In Busway shall be used where the load density provides an economic advantage over individual feeders to branch circuit panelboards.

1. Busways shall include an equipment grounding bus in the housing.
