DIVISION 13 - SPECIAL CONSTRUCTION

SECTION 13070D - INTEGRATED CEILINGS

A. COORDINATION OF INSTALLATION: It is preferred that integrated ceilings be made a part of the General Construction Contract with the General Construction Contractor being responsible for coordination of the complete installation, including the work of the HVAC and electrical Contractors. If an Associate feels that such ceilings should be installed by either of the other Contractors, this should be discussed with the University Project Manager during the Design Development Phase. The Associate’s HVAC and electrical consultants shall be present at this discussion.

SECTION 13120D - PRE-ENGINEERED STRUCTURES

A. ENGINEERING DATA REQUIRED: An analysis of framing and structural components is required. Data shall bear the seal and signature of a registered architect or professional engineer, in Ohio, attesting that the structures meet requirements of the specifications and comply with requirements of the OBBC and other applicable codes. Copies (four) of this data shall be submitted to the University Project Manager.
