Historic Homes and Heritage: A River Town
Step back in time as we visit the captivating river town of New Richmond on the Ohio. Founded in 1814 and named after the Virginia capital, the village has a rich history as a center for abolitionists and today is a template for historic preservation. We’ll first gather at the 1853 Ross-Gowdy House for an orientation focused on the town’s Abolitionist Movement and heroic tales about the Ohio River floods. Afterwards we have a rare opportunity to tour the 1846 Gibson House, a brick mansion with, of course, a river view. During lunch at the Front Street Café with your host, you’ll learn more fascinating facts about famous natives and how individuals can succeed in preserving our heritage. Next on our tour is an insider’s look at the 1868 Joseph Clasgens House, an Italian villa facing the Ohio. This will be followed by a visit to the columned Cranston Presbyterian Church which was a hotbed for abolitionists. Weather permitting, we shall do a walking tour of the village where you will gain a real appreciation of the Federal, Greek Revival, Italianate, Queen Anne and Art Deco architectural styles, all part of New Richmond.

Astronomy Classes at Cincinnati Observatory Center are held atop Mt. Lookout in one of our city’s true treasures, where the views are great (and the parking is free)!

**Behind the Scenes at the Observatory**
Look to the heavens through the oldest continuously used telescope in the world; explore the depths of the 1873 observatory including its attic and basement; and learn why President Adams laid the observatory’s original cornerstone in 1843. Hear the fascinating history of the founding of the observatory; investigate how the 19th century astronomers determined time for the city of Cincinnati; discover why the observatory was designated a National Historic Landmark; and find out what is in store for the future. The Moon will be viewed through the telescope following the program, weather permitting.

*John Ventre is the historian with the Cincinnati Observatory Center.*

**Tues., 7–9 pm; Feb. 24; $22, #1207-01**
**Location: COC (Mt. Lookout)**

**Constellations of the Season**
There are more stars in the sky than you can ever count; but you’ll see that finding your way around the sky has never been more interesting. Explore the imaginative figures we call constellations as you learn to use a planisphere to find any constellation at any given time and date. Further appreciate the night sky as we share some of the stories of the stars — how these clusters were identified, named, and achieved fame. Weather permitting, we will go outside to find many of the brighter constellations and you may also look through the observatory telescope.

*Dean Regas is the outreach astronomer with the Cincinnati Observatory Center, the co-host of the syndicated astronomy program Star Gazers, frequent guest of NPR’s “Science Friday,” and recipient of Astronomy Magazine’s "Out-of-this-World" Award for astronomy education.*

**Wed., 7–9 pm; Mar. 4; $22, plus $4 optional materials fee for star chart payable to instructor at class; #1044-01**
**Location: COC (Mt. Lookout)**

**Optics: Inside a Telescope**
Looking through a telescope is always fun; but did you ever wonder how the darn thing works? How are magnification and focus achieved? Why is the view upside-down in an astronomical telescope, but upside-right in binoculars? And is bigger really better? We’ll answer these questions and many more as we explore the inner workings of the “magic tube.” Fun, visually dramatic experiments will make the mysteries of lenses and mirrors crystal clear, even for those who are not friendly with physics. We’ll also peek inside a variety of working telescopes, and, weather permitting, view the heavens through some of them.

*Dave Bosse is an instructor of astronomy at UC where he has taught for over 35 years; and he has been a presenter at the Cincinnati Observatory Center for many years.*

**Tues., 7–9 pm; Jan. 27; $22, #1225-01**
**Location: COC (Mt. Lookout)**

**Understanding the Tides**
From surfers to sailors to military planners, tides have been a useful and at times, confounding natural phenomena. Usually relegated to the realm of weathermen, tides are actually of astronomical origin, the mechanism best explained by astronomers. Knowing that somehow the moon is involved is just part of the story. The Sun, the shoreline, the continental shelf, and even the barometric pressure all conspire to determine the effect of the tides. The effect can be very small or absolutely huge. Do lakes have tides? What about the Arctic Ocean? My bathtub? Let’s find out what makes tides tick.

*Dave Bosse is an instructor of astronomy at UC (over 35 years); and a long-time presenter at COC.*

**Tues., 7–9 pm; Feb. 10; $22, #1240-01**
**Location: COC (Mt. Lookout)**

**Dance of the Gods: Motions of the Planets**
For thousands of years our ancestors believed that our Earth was the immovable center of the Universe. Not until the European Renaissance did we finally glimpse the true nature of the motions of the planets and realize for the first time Earth’s place in the solar system. Travel with us through history to investigate the model of Ptolemy and how scientists who came more than a thousand years later deciphered nature’s clues to the understanding of the complex motions of the planets. We’ll discuss ideas and observations of Copernicus, Tycho, Kepler and Galileo and how these great scientists solved the mystery of “The Dance of the Gods.” Weather permitting, telescope viewing with the 1845 telescope will be part of the evening’s activities.

*Terry Flesch is an astronomer and a presenter at the Cincinnati Observatory Center.*

**Fri., 7–9 pm; Feb. 13; $22, #1218-01**
**Location: COC (Mt. Lookout)**

Weight Loss Hypnosis
Our focus is weight loss; however, with hypnosis, there is no “diet.” The premise is that over-eating is a habit and hypnosis can stop the habit. Begin by identifying the stressors in your life and be hypnotized for stress reduction. The next week, explore what habits control your eating and be hypnotized to change those habits. Finally, discuss ways to make exercise a safe, healthy and enjoyable part of your day. A third hypnosis helps instill the desire to incorporate exercise as part of your life. Change your life as you experience hypnosis as a tool to reduce stress and change eating and exercise habits.
