Viewing Enrollment Requirement Groups

This guide will cover:

- How to access and view an Enrollment Requirement Group for the purpose of viewing course requisite details.

Step One

- Navigate to the Enrollment Requirement Groups page using the following breadcrumb:

Step Two

- On the search page enter search criteria for the requirement group then click **Search**.

NOTE: It is recommended to search using the Subject Area and Catalog Number of the course if the Requirement Group number is unknown.
Step Three

- Navigate to the Requisite Detail tab. This tab displays details of the course and non-course requirements that have been linked together. If multiple rows exist, use the View All button to display all requirements.

- In the example above, course ENGL 1000 has two rows of requisites that require students to be in the ENGL-BA plan or the ENGL-BX plan. The two requisite lines are joined together with an “or” statement.

- The group line type determines the format for each line or row of data. The available line types are:
  - **Condition**: Specifies allowable values of data elements that are associated with a student, such as Academic Plan.
  - **Course**: Identifies a specific course a student must take to fulfill the requisite.
  - **Wild Card Course**: Specifies a range of courses based on academic group, subject area, and/or catalog.

You have now completed the steps for viewing an enrollment requirement group.
