

Phishing

Phishing involves a malicious actor deceiving you into interacting with a suspicious email, making it one of the foremost cyberattack methods.

What are some signs of a phishing email?

- Be cautious of emails requesting sensitive information like passwords or Social Security numbers.
- Exercise caution when encountering suspicious attachments or links within the email.
- Pay attention to email content with bad grammar and misspelled words.
- Maintain skepticism regarding offers or deals that appear excessively advantageous.

How do I report a phishing email?

- Identify a suspicious email from the Red Flags listed above.
- Click the **“Report”** button in Outlook or forward the suspicious email to infosec@uc.edu.

How can I avoid phishing attacks?

- Be skeptical of unsolicited emails. Avoid opening emails from unknown senders.
- Verify email addresses. Check the sender's email address carefully.
- Don't click on suspicious links. Hover your mouse over links in emails to preview the URL before clicking.
- Don't share personal or financial information.
- Use Multi-Factor Authentication (MFA) to add an extra layer of security, such as Duo Mobile Security.
