Clean your hands often

Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer if soap and water are not available.

Avoid touching your eyes, nose and mouth

Germs are often spread when a person touches something that is contaminated with germs and then touches his or her own eyes, nose or mouth.

Cover coughs & sneezes with your elbow

Cough or sneeze into the crook of your elbow, not your hands. If you blow into a tissue, throw the tissue away and wash your hands thoroughly.

Stay home if you feel sick

Call your health care provider for guidance. You may be advised to come to the office, the Emergency Department, or something else. Please call your doctor first.
