Metal Railings | 05 73 00

The following information shall be included in specifications prepared for use on all University of Cincinnati construction and renovation projects. This information is supplemental and not intended to be a complete specification.

GENERAL STANDARDS

General Criteria
Exterior decorative and utilitarian railings and balusters should be fabricated from stainless steel type 316, or hot-dipped galvanized mild steel. Baluster infill panels can be perforated stainless steel plate or mesh. Structural safety glazing rails and/or balusters are permissible. Exotic materials and/or designs must be approved by the University Architect. No ferrous metal sleeves into concrete slabs are allowed.
