Registration using Single Sign-On

Clients can use Single Sign-on for mobile login. By using SSO, users can log in to the mobile device using their regular, corporate login and password instead of having a separate one for the mobile device.

The Mobile Registration page under your Concur Profile Settings located in the web version of Concur provides a company code that users must enter on the Company Sign In screen on the mobile device (see below).

Sign-in for mobile devices

1. Open the Concur app. Tap **SSO Company Code Sign In**.

2. Enter **SSO Company Code**. Tap **Next**.

3. On **Company Sign On** screen, enter your Concur username and password. Tap **Sign In**.

*Use the same login credentials you use for the web version of Concur.*
