

Based on the FSIT assessment of technology needs in UC classrooms, the FSIT chair presented the following resolution to FS at the June 2008 meeting. The resolution passed unanimously as presented.

“Be it resolved that the Faculty Senate supports the following recommendation from the Faculty Senate IT Committee:

The Faculty Senate IT Committee strongly recommends that West Campus implement the plan documented in the report entitled “Report: Electronic Audio Visual Equipment Installation in General Purpose, Centrally Scheduled Classrooms” prepared by the Electronic Classroom Standards Committee. This will complete the installation of electronic equipment in all general- purpose centrally scheduled classrooms on West Campus. (This report is being made available on Faculty Senate web-site under IT Committee. A summary of the report is provided below.)

The Faculty Senate IT Committee strongly recommends that the College of Applied Science, Raymond Walters and Clermont regional campuses complete a report similar to the “Report: Electronic Audio Visual Equipment Installation in General Purpose, Centrally Scheduled Classrooms” prepared by the Electronic Classroom Standards Committee for their campus. We recommend these campuses set this as a budgetary priority and work with their established resources and departments to see it implemented.”
