

Dear Students,

Recently questions have arisen regarding spending from Undergraduate Student Senate. We recognize there were transparency issues in the past. We have been taking active steps to increase our communication and be more transparent as an organization. We are working to ensure these communication errors never happen again.

All bills are posted online, along with our budget. We keep records of everything. If at any point you wish to see any of those records, and they don't happen to already be online, please let us know. Transparency is one of our top priorities as an organization. For that reason we've started implementing public office hours, press releases on bills and initiatives, and more. Not only can you be up to date, you can also write bills to present to Senate. Through office hours you can connect with individuals of student government, express concerns, or work one-on-one to present changes.

We hope to reach a point where all students feel like they can express their concerns openly so we can truly create #OneUC. We sincerely apologize to any student who feels they can not communicate with us openly at this time. As student representatives we are open to communicate, which includes facing criticism. Our goal as an organization is to develop quality relationships with each student on campus.

We as a body are here to discuss any concerns you may have. We have not withheld any information. If you feel like you need more information, you may email any member of Student Government, come and speak at a student senate meeting, or come to the Student Government office at any time. We are here to serve and represent you. Continuously let us know how we can become better representatives.

Sincerely,

The Undergraduate Student Government
